

Fine Jewelry Care and Cleaning

Proper care and maintenance of your new jewelry is very important. This will ensure maximum longevity and your enjoyment of it. By following these three simple steps you should have years of satisfying use of your jewelry.

1. Never use jewelry cleaner or sonic cleaner.
2. Strictly avoid the jewelry contacting make-up or hair spray. When dressing, it is recommended that you put on your jewelry last and after you apply make-up or hair spray. After all, your jewelry is the finishing touch that completes your fashion look.
3. To clean your jewelry, dip it in a mild solution of liquid soap and water. Then rinse in warm water. Pat dry using a soft cloth.
